

Confidence in the built environment.

Town of New Richmond, Indiana
Water System Improvements
Bid-Opening Meeting Minutes
June 7, 2023 at 6:00 PM (Local, EST)

1) Opened Bids for Water System Project

- a) Bids were opened during the Town's regularly scheduled Town Hall meeting. See the attached sign-in sheet.
- b) One bid was submitted and read aloud by Mr. Eric Smith:

	<u>Division 1</u> <u>Water Treatment</u> <u>Plant</u>	<u>Division 2</u> <u>Water Distribution</u> <u>System</u>	<u>Total</u>
Graves Construction Services, Inc.	\$1,212,121.00	\$282,828.00	\$1,494,949.00

2) Project Purpose/Need:

- a) Mr. Keegan Dunn gave a brief description of the water project. The project will include replacement of the two well pumps, a new filtration system, and some yard piping at the well/elevated tank site. Additionally, there are two sections of small diameter water mains on Wabash Street and Washington Street that need to be upsized to provide sufficient flow to residents. Lastly, some of the Town's water meters are located within existing buildings which limits access for accurate meter readings.

3) Questions

- Q1) How much will water service rates increase?
A1) *That is unknown at this time and dependent upon a final rate analysis of the total project costs based on the bids received and any grant award from the IFA.*
- Q2) What sort of disturbance will the water main replacement work cause?
A2) *The new water main will be directionally drilled and should cause minimum disturbance.*
- Q3) Will there be any interruption in water service during the project?
A3) *There should be very little interruption in service. All of the plant work will be complete and operational prior to being put into service. There may be some minor interruptions while services are reconnected during water main work.*

Respectfully submitted,

Keegan E. Dunn, P.E.
Project Manager
